

ANNEXURE

SPECIFICATION OF NYLON STRING

Nylon woven braided string made from high tenacity multifilament nylon yarn, 3.0 mm diameter , having an inner core made from 3 (three ) strands. The string shall have a minimum breaking strength of 90 Kgs and an elongation of about 18 - 20 %.

The string should be supplied in a length of 500 or 1000 m without joints in between woven in separate rolls. Each roll shall have clear sticker containing the length of the string.

Note: The party must supply 25 meters of nylon string sample for testing in our laboratory. The test result from our laboratory will be final and binding.

**Without sample, offer will be summarily rejected.**
